

Product Requirements Document (PRD)

Team: User Engagement

Contributors: Manas Singh

Status: Brainstorming

Target Launch: 25th August 2025

Problem Definition

1. What is the problem?

Daily Rapido commuters face:

- **Inconsistent pricing** due to surge, traffic, and peak hour availability.
 - **No loyalty benefits**, leading to user churn.
 - **Booking friction** from repeated manual ride bookings and uncertain availability.
-

2. Who is facing the problem?

- **Office-goers** with fixed 9–5 schedules.
 - **Students** commuting daily to colleges or coaching.
 - **Blue-collar workers**, including retail staff, delivery partners, etc., who are cost-sensitive and commute up to 4 times daily.
-

3. What business value will this unlock?

- **Higher retention** through long-term engagement.
 - **Increased ride frequency** via prepaid rides.
 - **Revenue predictability** through upfront payments.
 - **Increased LTV**, reducing reliance on acquiring new users.
-

4. User Benefits

- **Cost savings** through discounted, predictable fares.
 - **Convenience** by avoiding surge pricing and booking hassle.
 - **Peace of mind** from having prepaid rides.
-

5. Why now?

- **Rising demand** post-COVID with in-office and in-person classes.
 - **Competitor momentum** from Ola, Uber, and metro subscriptions.
 - **Churn risk** from high-frequency users seeking better value.
 - **Market readiness** with user familiarity around subscriptions (e.g., OTT, DTC).
-

Goals

Primary Objectives

1. **Increase Retention of High-Frequency Users**
Metric: MAU growth among commuter segment.
2. **Drive Ride Volume Through Prepaid Commitments**
Metric: Avg. rides/user/month increase.
3. **Boost Revenue Predictability and Cash Flow**
Metric: % revenue from subscriptions.
4. **Reduce Churn**
Metric: Churn rate among frequent riders.

5. **Strengthen Brand Loyalty**
Metric: Improved NPS for subscribed users.

Functional Metrics

Metric	What It Measures	Why It Matters
Subscription Adoption Rate	% of eligible users who subscribe	Indicates value proposition
Activation Rate	% of subscribers using first ride within 3 days	Shows onboarding effectiveness
Ride Utilization Rate	% of rides used from the plan	Reveals pricing/UX gaps
Renewal Rate	% of users renewing	Measures satisfaction
Incremental Rides/User	Avg. ride growth post-subscription	Reflects behavior change
Churn Rate Comparison	Churn gap: subscribed vs. unsubscribed	Tests effectiveness

Non-Functional Metrics

Metric	Target	Reason
System Uptime	99.9%	Ensures availability
Purchase Success Rate	>98%	Prevents drop-offs
UI Latency	<2 seconds	Maintains user trust

Non-Goals

- Personalized/dynamic pricing based on ride history.
- Inclusion of autos, cabs, or other ride types.
- Corporate/bulk ride management.
- Integration with third-party loyalty platforms (e.g., Paytm Points).

User Personas & Validation

Persona	Age & Occupation	Commute	Pain Point	How Subscription Helps
Ramesh	32, IT Professional	2/day	Surge pricing, unavailability	Saves money, ensures peak-hour access
Priya	20, Student	2–3/day	Budget issues, rush hour gaps	Budget-friendly, seamless
Sunil	27, Retail Manager	2/day, 6 days	Cumulative cost, shift timing gaps	Predictable budgeting, reliability
Neha	29, Product Manager	3–4 days/week	Unpredictable fares	Avoids surge, stress-free routine
Anil	38, Private Tutor	4–6/day	Short ride cost adds up	Value-driven, efficient scheduling

Solution

1. Overview

Launch a **Rapido Subscription Plan** targeting frequent bike taxi users, ensuring affordability, consistency, and convenience.

2. Key Features

- **Fixed Monthly Fare** (e.g., 40 rides/month).
 - **Discounted Rates** for subscribers.
 - **Priority Availability** during peak hours.
 - **Flexible Plans** by distance/frequency.
 - **Rollover Rides** up to a monthly cap.
 - **In-App Management** for upgrades/downgrades/cancellations.
-

3. User Flow

1. Discover via in-app prompt/banner.
 2. Choose subscription plan.
 3. Complete payment (e.g., UPI, card).
 4. Use rides with automatic deduction.
 5. Auto-renew or manual renewal.
-

4. User Benefits

- **Predictable Costs**
 - **Frictionless Booking**
 - **Savings and Flexibility**
-

5. Business Benefits

- **Better Retention**
 - **Cash Flow Predictability**
 - **Higher Ride Frequency**
 - **Commuter Insights**
-

6. Tech Considerations

- Backend for ride tracking, payment, usage limits.
 - App UI/UX for plan management.
 - Push notifications for renewal, usage, and offers.
-

7. Key Success Metrics

- Subscription adoption %
 - Retention & renewal %
 - MAUs & avg. rides/user
 - Revenue share from subscriptions
 - Churn delta vs. unsubscribed users
-

8. Marketing Strategy

- **In-App Banners & Notifications**
 - **Referral Program** with rewards
 - **Social Media Campaigns**
 - **Partner Discounts** (colleges, co-working spaces)
-

Launch Plan

1. Pre-Launch

- Finalize pricing & backend
- Complete UI/UX
- Support & knowledge base setup

Beta Testing (2–3 weeks)

- Cities: Bangalore, Hyderabad
 - Target: Top 5% frequent users
 - Collect feedback & optimize
-

2. Launch Phase

- **Phase 1: Top 5 Metro Cities**
 - **A/B Test:** Plan tiers & pricing
 - **GTM Channels:** Social, app, partnerships
 - **Live Dashboard Monitoring** (adoption, latency, support issues)
-

3. Post-Launch

- **Full Rollout** in 4–6 weeks
 - Activate referral and rollover features
 - **Optimize** based on early data
 - Add personalized plan suggestions
-

Rollback Plan

When to Trigger

- High failure in ride deduction/payments
 - App crashes or misbilling
 - Spike in complaints > 1%
 - Negative sentiment/churn
-

Risks & Mitigation

Risk	Mitigation
Ride tracking errors	Real-time logs, automated QA
Payment failures	Trusted gateways, instant refunds
Low adoption	Early-bird promos, pricing tests
Abuse via sharing	Limit logins, detect anomalies
Support overload	Chatbot-first support, pre-trained staff

Future Work

Feature	Benefit
Corporate Plans	B2B ride management
AI Plan Suggestions	Personalized value
Auto/Cab Subscription	Cross-segment value
In-App Ride Scheduling	Set fixed daily times
Gamification/Rewards	Boost retention and virality
